

# Architectural Engineering Construction Information Services

**The Source**  
for Critical Information and Insight™

Save time and increase productivity with integrated access to model codes, standards, and regulations

**Whether you are involved in the design, specification, approval, build, or maintenance of a construct-related project, access to technical information is critical to success. Using the most current and complete data ensures that proper design, performance and test criteria are used; compliance regulations are met; and products are quickly located. Lack of access will decrease employee productivity and place pressure on project deadlines. This will result in blind referencing, construction rework, reduced quality, catastrophic safety implications, and corporate or personal liability. The solution is desktop access to IHS Architectural Engineering Construction Information Services.**

The IHS Construction Solution with process driven online and CD-ROM solutions, provides integrated access to:

- Model Building Codes and Referenced Standards
- IHS Plan Analyst Code Compliance Software
- State-Specific ADA (Accessibility) Compliance Manuals

## Model Codes and Referenced Standards

The IHS Model Code collections include a wide range of Model Building Codes that are used extensively by construction professionals. Model Codes provide reasonable and enforceable building regulations for protection of the public health, safety, and welfare in the built environment. The IHS Model Code collections combine the full-text Codes with powerful indexing software for rapid searching and easy retrieval.

Model Building Code Collections are available from these authoritative bodies: ICC, ICBO, BOCA, SBCCI, NFPA and New York State.

The AEC Referenced Standards collections are a comprehensive and easy-to-use source of standards and other technical information referenced in the Model Codes. Standards supplement the code by setting establishing requirements that a method or material must meet. They cover all aspects of the design, engineering, and construction process.

Access more than 1,000 referenced standards from: ACI, ANSI, ARI, ASCE, ASHRAE, ASME, ASSE, ASTM, AWWA, CSA, IEEE, NEMA, NFPA, SMACNA, UL and more.

## IHS Plan Analyst Code Compliance Software

IHS Plan Analyst software checks for code compliance, assisting architectural practices and local building authorities in completing code studies and building plan checks quickly and efficiently.

Plan Analyst enables architects to conduct code studies and obtain building permits faster, and includes the ability to explore how code requirements change with minor modifications to the project description. Building officials are able to check and issue permits more quickly. This proven software saves valuable design time and eases the compliance process.

### State-Specific ADA (Accessibility) Compliance Manuals Collection

The state-specific ADA Compliance Manuals Collection from IHS delivers exclusive time-tested manuals from Jordan Publishing, utilized in the construction marketplace for over eleven years. Jordan is the premier publisher of Americans with Disabilities Act (ADA) state-specific accessibility compliance manuals, simplified to help users find relevant information quickly. These proven manuals provide architects, interior designers, property owners, contractors, and others with a clear and concise reference source of the exact requirements to assist with state-specific accessibility compliance.

States currently available include Arizona, California, Florida, Georgia, Illinois, Indiana, Maryland, Massachusetts, Michigan, Minnesota, New Jersey, New York, Ohio, Oregon, Pennsylvania, Texas, Virginia, Washington, and Wisconsin.

### Single Source

Enjoy the convenience of accessing Codes and standards from a single source. Eliminate the time and cost of managing and processing accounts with multiple information providers.

### Helpline Support

Subscribers enjoy unlimited access to the IHS Customer Service helpline for assistance with unusual or difficult searches, or for advice on software installation, networking, and general technical enquiries.

### Organization Wide Access

Experience the convenience of organization-wide access, 24x7. Licensed users can quickly access the information at their desktops.

### “Fast and Easy” Document Access

Search by document number, document title, keywords, or publishing organization to quickly locate information. Since documents are provided in PDF, the information seen is extremely accurate. Information may also be copy-pasted into other applications (copyright permitting).

### Professional Management

With more than 45 years of experience in managing technical information, IHS eliminates the need for companies to update and maintain their own document collections, resulting in reduced overhead, increased productivity, and ultimately contributing to the bottom line.

## Order Options

IHS offers the following solutions delivered via the Internet:

	Order Code	✓
AEC Referenced Standards Collection Complete	ARSC	
Building and Residential Code Referenced Standards Collection	IBCRS	
Building Code Referenced Standards Collection	IBCR	
National Fire Protection Association (NFPA) Fire Codes (incl. NFPA 5000)	Q639	
National Fire Protection Association (NFPA) Handbooks	Q64A	
International Code Council (ICC) 2000 I-Code Collection	ES275	
International Code Council (ICC) 2003 I-Code Collection	ICCC	
Building Officials Code Administrators (BOCA) 1990, 1993, 1996, 1999 Code Collections	566N	
Building Officials Code Administrators (BOCA) Code Commentaries	567N	
International Council of Building Officials (ICBO) 1997 Code Collection	ES276	
Southern Building Code Congress International (SBCCI) 1997 Code Collection	SBC97	
Southern Building Code Congress International (SBCCI) 1999 Code Collection	SBC99	
2002 New York State Building Codes	NYSBC	
ASME Boiler & Pressure Vessel Code	Various	
State-Specific ADA (Accessibility) Compliance Manuals Collection (20+ States)	JRDN	
Builders Hardware Manufacturers Association	SSSN
